

ELEGANCE

Series Overview

ELEGANCE

The ELEGANCE French-American series includes 27 swatch products. The fabric craftsmanship and materials incorporate environmentally friendly natural fibers (such as natural cellulose fibers like organic cotton and linen). This makes the fabric naturally soft, drapable, and skin-friendly, with functions like anti-static and UV protection.

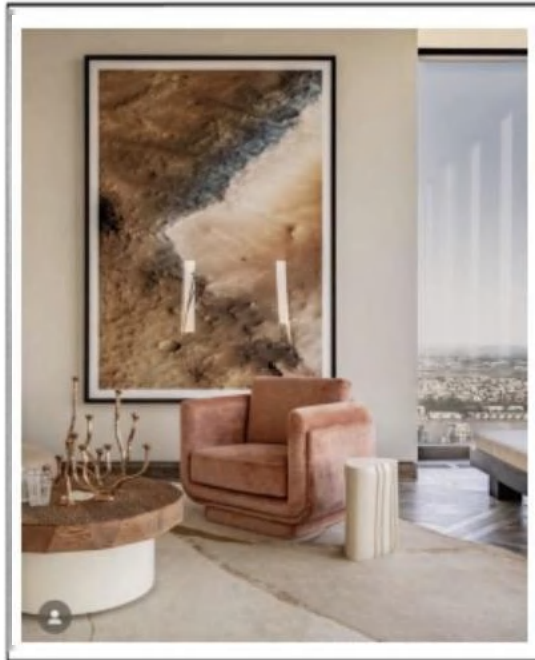

DESIGN

Style Analysis

A chemical equation of French elegance and American relaxation: using "French genes" to meet aesthetic needs and "American practicality" to solve functional pain points. Following the principle of "mixing without chaos", it builds replicable light luxury living scenes.

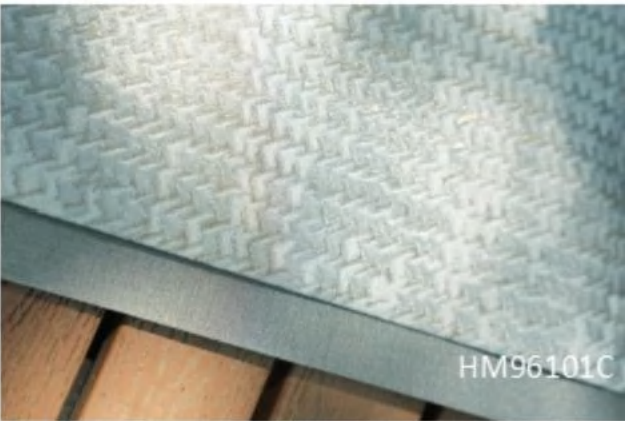

The balanced aesthetics of "French style without affectation, American style without sloppiness" makes the style an "invisible driver" of the space's temperament.

W6631

Herringbone pattern with modern look, balances light-shielding, breathability and drape

W6632

Inspired by Hawaiian bamboo, matte bamboo texture conveys
"enthusiasm and tranquility coexist"

HM96103A

HM96103B

HM96103C

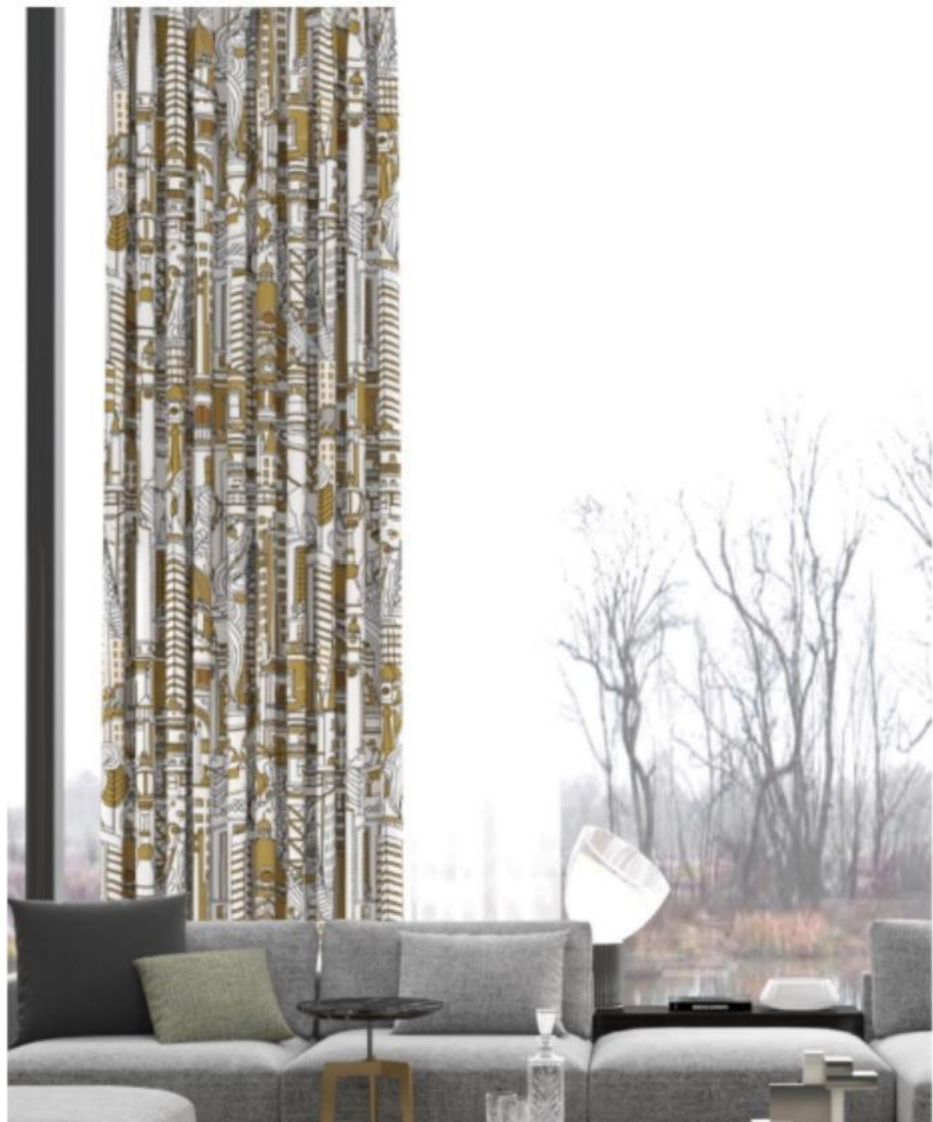

"Freedom and collision" theme, with colorful brush textures, showing American freedom

W6814

45° herringbone twill, cotton-linen blend, eco-friendly and anti-static.
W6669: French street silhouettes, combining laziness and vitality of Paris

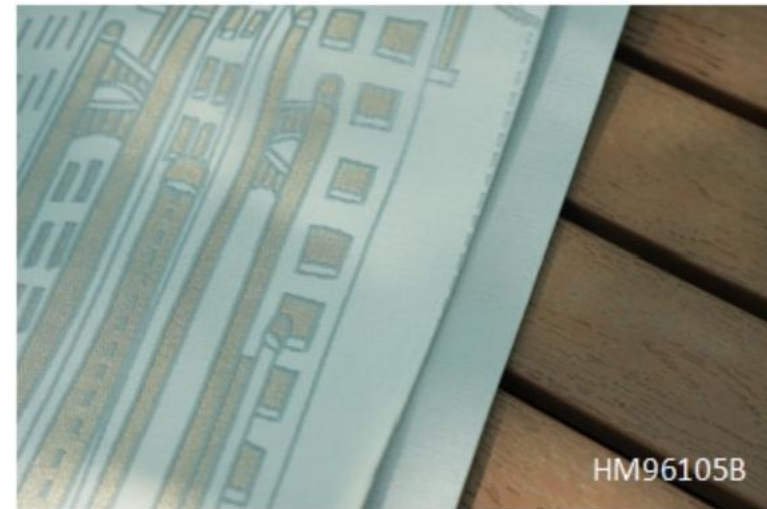

W6669

French street silhouettes,
combining laziness and
vitality of Paris

HM96105A

HM96105B
